

## New Nissan Note 'N-TEC' limited edition announced

### NEW NISSAN NOTE 'N-TEC' LIMITED EDITION ANNOUNCED

- **Limited Edition Nissan Note 'N-TEC' on sale from February 2015**
- **Enhanced interior and exterior design with class-leading spaciousness**
- **Engineered for active, modern families with advanced safety features included as standard**

A special, limited edition of the Nissan Note, the Note N-TEC, is now on sale. Based on the Acenta grade Note model, the N-TEC is a stylish, compact family car, featuring even more smart design, equipment and advanced technologies as standard.

Enhanced exterior design features include rear window privacy glass, satin silver door handles and mirror caps, 16-inch alloy wheels in a limited edition design as well as unique 'N-TEC' badging. The Dynamic Styling Pack, included as standard on the Note N-TEC, creates a more energetic exterior look, with front and rear sport bumpers, side sill finishers, a gloss black radiator grille and sport headlamps with distinctive black bezels.

A leather-wrapped steering wheel, featuring the same eye-catching blue stitch detailing found on the N-TEC's premium seats, complements Nissan's stylish, high quality interior finish.

The Note N-TEC comes fully-equipped with Nissan's intelligent and innovative Safety Shield technology as standard, bringing high-end technology and safety features to the B-class segment. Usually reserved for Tekna, the highest grade Note model, it comprises of three forward-thinking technologies - Blind Spot Warning, Lane Departure Warning and Moving Object Detection - designed to make driving a safer and more enjoyable experience for the whole family.

Bringing premium technology to a new audience, the Note N-TEC also features the latest generation NissanConnect system, available with DAB digital radio and a range of apps, including TripAdvisor and Google Search. Advanced Rear View Camera technology helps to take the stress out of tricky reversing manoeuvres, while automatic lights, wipers and air-conditioning also come as standard. An I-key (Keyless entry) and Start button are available as an optional extra.

The Note N-TEC is available in the full Note colour range, including an Ink Blue option, new to the Nissan Note.

#### NOTES TO EDITORS

##### Nissan Safety Shield

The Nissan Safety Shield pack comprises the following three technologies:

- ***Blind Spot Warning***

A feature once reserved for cars in the premium sector, Nissan's system uses the rear wide view camera to detect vehicles in the hidden blind spot areas on both sides of the Note. If a vehicle is detected in either blind spot, a discreet warning light illuminates in the glass of the Note's wing mirror.

- ***Lane Departure Warning***

Another premium feature making its debut in the B-segment, Lane Departure Warning detects if the car is starting to drift out of lane. Advanced computer programming detects even faint road markings allowing the car to determine if it is drifting out of position without indicating. According to research, Lane Departure Warning systems could prevent nearly 1 in 10 accidents that occur when changing lanes on motorways. According to research, Lane Departure Warning systems could prevent nearly 1 in 10 accidents that occur when changing lanes on motorways. Driver inattention causes 78% of accidents, near-accidents and unintentional lane deviations according to recent reports.

- ***Moving Object Detection***

Building on the capabilities of Around View Monitor, this new function effectively gives the driver a digital co-pilot to help them look at what might be approaching the path of their reversing Note.

Mounted on the tailgate and having a convex lens, the rear wide view camera has a sweep of vision in excess of 180 degrees, giving it an unparalleled field of vision at the back of the car. Images from the camera are displayed on the 5.8-inch NissanConnect touch screen.

#### **About Nissan in Europe**

Nissan has one of the most comprehensive European presences of any overseas manufacturer, employing more than 17,600 staff across locally-based design, research & development, manufacturing, logistics and sales & marketing operations. Last financial year Nissan plants in the UK, Spain and Russia produced more than 675,000 vehicles including award-winning crossovers, small cars, SUVs, commercial vehicles and electric vehicles, including the Nissan LEAF, the world's most popular electric vehicle with 96% of customers willing to recommend the car to friends. Nissan now offers a strong line-up of 23 diverse and innovative models in Europe under the Nissan and Datsun brands.

#### **About Nissan Motor Co.**

Nissan Motor Co., Ltd., Japan's second-largest automotive company, is headquartered in Yokohama, Japan, and is part of the Renault-Nissan Alliance. Operating with more than 244,500 employees globally, Nissan sold almost 5.2 million vehicles and generated revenue of 10.5 trillion yen (USD 105 billion) in fiscal 2013. Nissan delivers a comprehensive range of more than 60 models under the Nissan, Infiniti and Datsun brands. In 2010, Nissan introduced the Nissan LEAF, and continues to lead in zero-emission mobility. The LEAF, the first mass-market, pure-electric vehicle launched globally, is now the best-selling EV in history with almost 50% share of the zero-emission vehicle segment.
